

Third Technical Session | Towards an integrated vision of climate and clean air action plans: perspectives and experiences

The third technical session of the Air Quality community of practice was held last April 26th, 2022, and was moderated by the WRI Mexico Air Quality Coordinator, Ana Cecilia Perales. Its objective was to share with the Community of practice the perspectives and experiences in the design and implementation of integrated action plans for air quality and climate change.

Robert Kehew spoke about the integration of climate action and clean air agendas in Madrid and Mexico.

Rafael Borge detailed details of Plan A implemented in Madrid.

Huantian Zhang described China's experience in integrating such policies.

Adriannah Mbandi provided the African context on this topic.
