

CLIMATE HAZARD VULNERABILITY ASSESSMENT

CHVA STEPS

1. BACKGROUND PREPARATION

Build a team with practitioners from relevant fields.

1

2. CITY PROFILING

Research the background of the focus area. This includes the climatic, environmental, ecological, spatial social and economic dynamics.

2

3. SCOPING AND COMMUNITY ENGAGEMENT

Engage and partner with community organizations. Consult the community through surveys and support from local organizations.

3

4. DATA COLLECTION AND ANALYSIS

Collect and analyze key data on hazards and vulnerability. Check the data for accuracy and robustness and close data gaps.

4

5. ASSESSMENT PHASE

Use the data to complete the Hazard and Identification Assessment. Then perform the Exposure Analysis and then the Vulnerability Assessment.

5

6. DISSEMINATION

It is essential to disseminate information and insights to the right people! Convene events and share findings with stakeholders in a language they best understand.

6

7. REPORT COMPLETION AND NEXT STEPS

Assemble information including maps, process and insights into a report.
Explain the analysis clearly for the audience.
